

## BIO

*Mario Maywa*, a Peruvian musician, focuses on meditative music, folk, and ancestral sounds from around the world, approaching them from a contemporary and experimental perspective. His artistic journey is deeply influenced by his experiences with Peru's master plants and his study of popular music, allowing him to explore and fuse elements of tribal, folkloric, psychedelic, and modern languages. The result is an authentic and personal proposal: a mystical sound experience that bridges the nuances of East and West.

With more than two decades of career, Mario is a composer, multi-instrumentalist, producer, and singer-songwriter. He has created and composed music for various formats, including dance, film, theater, rituals, ceremonies, performances, Ecstatic Dance Live Music, and musical bands. His body of work includes 15 albums and several singles as an independent composer and producer.

One of his most emblematic projects is Maywa, a band with which he has built more than 13 years of trajectory and produced 4 albums. Currently, Mario continues his work as a solo artist and singer-songwriter, consolidating his personal style that combines ancestral and medicine music, folk, and contemporary elements. His most recent releases include:

- Tú eres otro yo (LP, 2025)
- Viento Eléctrico (single, 2024)
- Me hace tanto bien (single, 2024)
- Estrellas en el Valle (single, 2023)

Mario has brought his music to international stages in countries such as Spain, Italy, the Czech Republic, Austria, Germany, Ecuador, Thailand, Sweden, and France. Since 2019, he has also been active in the Ecstatic Dance movement, performing live music and being one of its founders in Peru, later continuing his participation across Europe.

Currently, he also plays an active role as an organizer and facilitator of retreats and training programs in the field of sound healing and sonotherapy. From his school based in Granada, Spain, he shares his knowledge and passion for the healing power of music, continuing his mission to foster deep connections through art, sound, and wellbeing.
